

FININ2MIN PROFESSIONAL LAW CORPUS - BATCH 04

Pre-litigation Mediation and Commercial Courts Section 12A Master

Distinguish contractual voluntary mediation, Commercial Courts Act mandatory PIMS, urgent interim-relief exception, limitation and failure-certificate evidence.

Reviewed through 2026-07-18

Authors: CA Nikhil Gupta and Kajri Singh

Instrument / implementation module

Source and commencement status: The official India Code page records the Act and all 65 sections, but section 1 footnote shows only a limited group commenced on 9 October 2023. This publication therefore identifies provision-level status and does not treat uncommenced provisions or Schedule amendments as operative. Open official Act PDF | Department of Legal Affairs instruments.

Dedicated Finin2min Summary - Chapter in 2 Minutes

- Distinguish contractual voluntary mediation, Commercial Courts Act mandatory PIMS, urgent interim-relief exception, limitation and failure-certificate evidence.
- Provision-level commencement is the first legal gate: only 21 sections were commenced by S.O. 4384(E) on 9 October 2023 in the reviewed official record.
- Use the India Code Act and the Department of Legal Affairs Gazette files as controlling sources.
- Separate the Mediation Act from existing Commercial Courts, consumer, company, court-annexed and special-statute mediation rules.
- Document consent, authority, limitation, confidentiality, settlement drafting, tax, stamp and enforcement before closing the file.

Section-by-section provision map

Provision / gate	Topic	Commencement / status	Finin2min decode	Implementation	Evidence / control
Gate 1	Commercial dispute/ value	Operational control	Convert commercial dispute/value into a matter-specific decision and evidence test.	Assign owner, due date, reviewer and escalation.	Commercial dispute/value checklist, approval and source record.
Gate 2	Urgent interim relief	Operational control	Convert urgent interim relief into a matter-specific decision and evidence test.	Assign owner, due date, reviewer and escalation.	Urgent interim relief checklist, approval and source record.
Gate 3	PIMS notice and service	Operational control	Convert pims notice and service into a matter-specific decision and evidence test.	Assign owner, due date, reviewer and escalation.	PIMS notice and service checklist, approval and source record.
Gate 4	Mediation attendance	Operational control	Convert mediation attendance into a matter-specific decision and evidence test.	Assign owner, due date, reviewer and escalation.	Mediation attendance checklist, approval and source record.
Gate 5	Settlement/ non-starter	Operational control	Convert settlement/non-starter into a matter-specific decision and evidence test.	Assign owner, due date, reviewer and escalation.	Settlement/ non-starter checklist, approval and source record.
Gate 6	Limitation and filing	Operational control	Convert limitation and filing into a matter-specific	Assign owner, due date, reviewer and escalation.	Limitation and filing checklist,

Finin2min clause-by-clause decode

Gate 1 - Commercial dispute/value

Status: Operational control

Convert commercial dispute/value into a matter-specific decision and evidence test.

Implementation: Assign owner, due date, reviewer and escalation.

Evidence: Commercial dispute/value checklist, approval and source record.

Gate 2 - Urgent interim relief

Status: Operational control

Convert urgent interim relief into a matter-specific decision and evidence test.

Implementation: Assign owner, due date, reviewer and escalation.

Evidence: Urgent interim relief checklist, approval and source record.

Gate 3 - PIMS notice and service

Status: Operational control

Convert pims notice and service into a matter-specific decision and evidence test.

Implementation: Assign owner, due date, reviewer and escalation.

Evidence: PIMS notice and service checklist, approval and source record.

Gate 4 - Mediation attendance

Status: Operational control

Convert mediation attendance into a matter-specific decision and evidence test.

Implementation: Assign owner, due date, reviewer and escalation.

Evidence: Mediation attendance checklist, approval and source record.

Gate 5 - Settlement/non-starter

Status: Operational control

Convert settlement/non-starter into a matter-specific decision and evidence test.

Implementation: Assign owner, due date, reviewer and escalation.

Evidence: Settlement/non-starter checklist, approval and source record.

Gate 6 - Limitation and filing

Status: Operational control

Convert limitation and filing into a matter-specific decision and evidence test.

Implementation: Assign owner, due date, reviewer and escalation.

Evidence: Limitation and filing checklist, approval and source record.

Finin2min implementation explanation

Create a matter control sheet that identifies the operative legal route, provision-level commencement, parties, subject matter, special law, mediator/provider, process rules, limitation, authority, evidence, settlement form and enforcement path. No team should rely on a page without the current source and event-date status.

Practical examples and calculations

- Distinguish contractual voluntary mediation, Commercial Courts Act mandatory PIMS, urgent interim-relief exception, limitation and failure-certificate evidence.
- Create a dispute-specific chronology, authority matrix, settlement term sheet, tax/stamp note and source register before use.

Timeline model: where an operative route adopts the Act model, separately calculate invitation/service, first appearance, 120-day process period, agreed extension up to 60 days, optional registration clock of 180 days, and challenge clock of 90 days plus a possible further 90 days. Do not apply these figures to an uncommenced provision.

Settlement value model: principal + agreed interest + tax adjustments + costs + security value - payments/credits/set-off, with milestone and default sensitivity.

Practical transaction application

Classify the dispute and contract, issue a source-controlled invitation, secure settlement authority before substantive bargaining, reconcile commercial and legal terms, and close only after signatures, tax/stamp treatment, payment/security, filings and retention are complete.

Authority, consent and execution controls

Verify legal entity names, capacity, board/partner/POA authority, monetary and non-monetary settlement limits, government approval hierarchy, lender/insurer/third-party consents and authority to sign, register, pay, release and withdraw proceedings.

Stamp duty and registration alerts

Stamp duty and registration are State- and instrument-specific. A settlement dealing with immovable property, transfer, release, security, guarantee, lease, partition, IP or other registrable rights requires a State-law memorandum before signature. Electronic execution does not remove stamp duty.

Evidence and document-retention checklist

Maintain two controlled indexes: protected mediation material and independently existing evidence. Preserve contract, authority, notices, service, process agreement, mediator disclosures, attendance, cost, settlement signatures, tax/stamp review, registration, payment, withdrawal and enforcement records.

- | | |
|--|--|
| • Contract and mediation clause | • Independent-evidence index |
| • Special-law and commencement memo | • Attendance and cost ledger |
| • Invitation, notice and service proof | • Settlement term sheet and approvals |
| • Party identity and legal capacity | • Signed/authenticated agreement |
| • Board/partner/POA authority | • Stamp and registration note |
| • Mediator appointment and disclosure | • GST/TDS/accounting working |
| • Process agreement and rules version | • Payment/security/withdrawal proof |
| • Protected-material index | • Challenge/enforcement/retention file |

Performance, delivery and payment controls

Translate each settlement promise into owner, amount, currency, tax, date, milestone, acceptance test, invoice/credit note, security, escrow, default interest, cure, set-off, release trigger and proof of completion.

Breach, loss, mitigation and remedy framework

Quantify principal, interest, admitted/disputed amounts, counterclaims, direct loss, avoided cost, mitigation, costs, tax and security. Select cure, variation, acceleration, termination, enforcement, fresh proceedings or insolvency strategy without double recovery.

Limitation and forum controls

Maintain a dated chronology for cause of action, invitation, statutory notice, first appearance, sessions, termination, settlement, challenge, acknowledgment and filing. Identify court/tribunal jurisdiction, commercial-court PIMS, special-statute forum and any exclusion or condonation rule.

Arbitration and mediation interface

Draft the interface between negotiation, mediation, expert determination, adjudication and arbitration. Preserve urgent interim relief and limitation. Avoid deadlock clauses with no transition, indefinite negotiation or contradictory seat/forum wording.

Company, partnership, GST and tax overlays

Check Companies Act/LLP/partnership authority, related-party and disclosure issues; GST price/credit-note and place-of-supply consequences; TDS, income recognition and deductibility; stamp/registration; FEMA for cross-border payments; IBC moratorium/claims; competition and sector approvals.

Chapter-specific decision flowchart

Pre-litigation Mediation and Commercial Courts Section 12A Master - decision flow

Stop at any gate that lacks current law, consent, authority, limitation, evidence or executable settlement terms.

Finin2min Q&A

Is the entire Mediation Act operational because India Code shows an enforcement date of 9 October 2023?

No. The section 1 footnote identifies a limited list of commenced provisions. Apply a provision-level commencement matrix.

Can parties still mediate where a Mediation Act provision is uncommenced?

Often yes under contract, court-annexed rules, special statutes, institutional rules or general settlement law, but do not attribute uncommenced statutory consequences to the Act.

Is pre-institution mediation optional in every commercial dispute?

No. Commercial Courts Act section 12A and the PIMS Rules require separate current-law analysis, including the urgent interim-relief exception.

Does a signed settlement automatically have decree status under section 27?

Only when the relevant Mediation Act enforcement provisions are legally operative and conditions are met. Otherwise analyse contract, consent decree, arbitral consent award or special-statute routes.

Can the mediator decide who is right?

No. A mediator facilitates voluntary resolution and should not adjudicate or impose a settlement.

May mediation sessions be recorded?

The Act contemplates confidentiality and no audio/video recording, but confirm the operative legal and institutional rule set for the matter.

What authority is needed to settle for a company or LLP?

Use specific board, committee, partner, power-of-attorney or delegated authority covering amount, non-monetary terms, releases, security and tax consequences.

Does mediation stop limitation automatically?

Do not assume so. Calculate limitation under current operative law, special statutes, acknowledgements, exclusions and any standstill arrangement.

Is an online settlement valid with an electronic signature?

Potentially, subject to the IT Act, contract law, authority, platform integrity, electronic-signature method, stamp/registration and the operative mediation framework.

Are all rules and regulations under the Act now final?

The reviewed sources identify three final 2024 Council governance/accounts rules. The package separately flags regulations, schemes, guidelines and process rules that require current Gazette confirmation.
