Finin2min implementation explanation

Classify the document and operative rights. Build the Central and State source pack. Verify title, authority, stamp, property description, time, office, presenter, identity and execution. Reconcile the final registered record and preserve remedies.

Practical examples and calculations

Scenario: A property instrument is commercially agreed before document classification, State rules, stamp, authority, office jurisdiction and presentation mechanics are complete. Registration must be treated as a controlled legal closing, not a clerical step.

Control	Method	Evidence
Transaction value	Reconcile consideration, debt, non-cash value, guideline value and taxes.	Agreement, valuation and ledger
Registration clock	Map execution, presentation, appearance, completion and remedy dates.	Chronology and receipts
Exposure	Quantify title/stamp/fee defects, delay, litigation, interest and cure cost.	Risk register and legal model
