Finin2min implementation explanation

Classify the document and operative rights. Build the Central and State source pack. Verify title, authority, stamp, property description, time, office, presenter, identity and execution. Reconcile the final registered record and preserve remedies.

Practical examples and calculations

Scenario: A deed is signed by different executants on different dates and reaches the registration office after the first four-month period. The file must compute each execution date, section 24 treatment, section 25 eligibility, fine, application and proof of unavoidable delay.

Control	Method	Evidence
Ordinary presentation	Count four months from the relevant execution date, subject to statutory interpretation and State procedure.	Executed document and calendar
Additional delay route	Test urgent necessity/unavoidable accident, additional period and fine.	Application, supporting proof and order
Foreign execution	Record arrival in India and section 26 conditions.	Passport/courier/consular evidence
